You may provide additional comments on the student's training period:

During the period of the industrial training, the student complied with the company's rules and regulations well. He performed perfectly on following the instructed training plan. He treated the work carefully and with modesty, at the same time kept curious and respected his workmates. When difficulties appear, he was able to form a discussion with his workmates actively, and manage to solve them together. Finally, he accomplished the assigned task and passed the project review with no objection before leaving our company.
